Cookie Policy

HighBinary Technologies Ltd | Version 1.1 | Revised 25 November 2026

Application: this revision takes effect upon authorised publication and any notice or acceptance required by applicable law.

01 / Purpose and scope

This Cookie Policy explains how HighBinary Technologies Ltd ("HighBinary", "we", "us") uses cookies and similar technologies on highbinarytrading.com and its associated web-based services. It applies to visitors and registered users and should be read together with our Privacy Policy and Terms & Conditions.

02 / What cookies and similar technologies are

Cookies are small files stored on or accessed from a device by a website. Similar technologies include local storage, session storage, pixels and device identifiers. References to cookies in this policy include these technologies where relevant. They may contain identifiers, preferences or session information; some may constitute personal data.

03 / Strictly necessary cookies

These technologies support essential services requested by users, including authentication, session continuity, security, fraud prevention, load balancing and recording privacy choices. They are used without consent only where an applicable legal exemption permits. They cannot be disabled through optional cookie controls, although browser settings may block them and impair essential functionality.

04 / Authentication and security

Authentication and security technologies may help maintain signed-in sessions, protect account access, detect suspicious activity and prevent unauthorised requests. Their classification depends on their actual purpose and necessity; technologies that are not exempt from consent are subject to the applicable consent requirements.

05 / Preferences and functional cookies

These technologies may remember language, appearance, interface preferences and other optional settings. Where consent is required, they are activated only after the user has selected the relevant category. Refusing them may mean that preferences must be entered again.

06 / Performance and analytics

Analytics technologies may help assess service performance, identify errors and understand how features are used. They are not treated as strictly necessary merely because they are useful to HighBinary. Where consent is required, they remain inactive until the relevant consent is obtained.

07 / Advertising and marketing technologies

HighBinary does not use advertising or marketing cookies under the current cookie configuration. If introduced in the future, the Cookie Policy and Cookie Settings must be updated and valid consent obtained where required before activation. Promotional email consent is separate.

08 / First-party and third-party technologies

First-party technologies are set by the website; third-party technologies may be provided by external services supporting authentication, infrastructure, security or analytics. Before optional technologies are activated, their actual names, providers, purposes, durations and first- or third-party status must be disclosed in Cookie Settings. Third-party processing is subject to the Privacy Policy and applicable law.

09 / Cookie duration

Session technologies generally expire when the session ends, subject to browser behaviour. Persistent technologies remain until the configured expiry or earlier deletion. Each technology must have a justified duration and be listed with its actual retention period in Cookie Settings before use. No universal retention period is assumed.

10 / Consent and cookie settings

Optional technologies remain disabled until a freely given, specific, informed and unambiguous choice is made. Use Accept All, Reject Optional or Customize Settings. Rejecting optional technologies must be as easy as accepting them. Continued browsing, silence and preselected optional choices do not constitute consent.

11 / Changing or withdrawing consent

Users may revisit Cookie Settings through the website footer at any time to change or withdraw their choices. Withdrawal applies prospectively and does not affect the lawfulness of prior processing. Optional technologies must stop being used for the withdrawn purposes; existing cookies may also be removed through browser controls where necessary. Essential services remain available subject to technical requirements.

12 / Browser and device controls

Most browsers allow users to view, delete or block cookies and restrict site storage. These settings may operate separately from HighBinary consent controls. Deleting cookies may sign users out or reset preferences. Blocking essential technologies may prevent account access or other requested functions. Users may need to manage choices separately on different browsers or devices.

13 / Consent records and changes

HighBinary may retain proportionate records of consent choices, including the relevant policy or notice version, choice and time, to respect preferences and demonstrate compliance. Fresh consent is required when a material change introduces a new purpose or otherwise invalidates existing consent under applicable law. Consent records are retained only as necessary for their purpose.

14 / Personal data and lawful processing

Where cookie information constitutes personal data, it is processed in accordance with applicable data protection law and the Privacy Policy. Permission to store or access information on a device is distinct from the lawful basis required for subsequent personal data processing. HighBinary applies purpose limitation, data minimisation, appropriate security and retention controls.

15 / International transfers and service providers

Service providers may process information in different jurisdictions. Where applicable, international transfers of personal data are subject to legally required safeguards, as described in the Privacy Policy. Access to cookie-related information is limited to authorised parties for legitimate purposes.

16 / Your privacy rights

Depending on applicable law, users may have rights to access, correct, erase or restrict processing of personal data, object to processing, obtain portability and withdraw consent. Users may also complain to a competent data protection authority. Requests may be submitted through the Help Center or Contact Us section. Identity verification may be required where proportionate.

17 / Policy updates

HighBinary may update this policy to reflect changes in technologies, services or legal requirements. The current version is made available on the website. Material changes will be communicated as appropriate, and renewed consent will be requested where required.

18 / Company and contact information
